AirProPak Benefits

Eliminate Expensive, Climate Controlled Warehouses – Our AirProPak Kits create a climate controlled environment using flexible moisture barrier materials and moisture absorbing desiccants. There is no need for an expensive climate controlled warehouse to eliminate moisture and prevent corrosion.

Reduce Maintenance Personnel – Our unique preservation solution eliminates the need to fly aircraft during storage. Each kit is designed to provide easy access to the interior space to perform maintenance tasks without having to completely unwrap the helicopter.

Manufacturer Approved – Over the last few years, we have worked with every major helicopter manufacturer to develop a storage preservation solution that maintains equipment function during storage while eliminating exposure to corrosive elements and debris. Helicopters we have packaged include:

- AW139
- Bell 412
- S76
- Airbus 225
- EC135
- S92
- Bell 212
- EC145
- SP332

Significant Cost Savings – The average cost of our AirProPak kits is a fraction of the cost of alternative methods such as securing a climate controlled warehouse and hiring maintenance workers and pilots to maintain stored helicopters.

Installation Service Included – Our team of packaging professionals will come to you to implement our AirProPak Helicopter Preservation Kits. We also offer training services so your team can package items using our world-class processes. Over 100 helicopters and engines from major companies have been put into long term storage in the last 6 months using our kits and processes.

Protective Packaging Corporation

Our company was initially founded in 1976 to service the US government and military. As a result, we have extensive experience developing packaging solutions that adhere to the most rigorous requirements. From protecting a weapons system for 20 year storage in a bunker, to preserving massive turbine generators for ocean transport, we pride ourselves on our versatility. We offer consulting services and on-site packaging services to help you select and implement the most appropriate and cost effective solutions.
