On-Site Packaging Services

We can provide on-site inspections, help you select materials, recommend equipment and create prototypes to deliver value driven packaging solutions that meet even the most stringent requirements for industrial, commercial, and consumer goods. We can even package your products for you. We have a team of packaging professionals that travel all over the world packaging products for clients and training their personnel to do the same.

Bags & Covers Made to Order

Protective Packaging Corporation uses industry leading products and materials to develop custom packaging solutions to prevent corrosion on equipment, machinery, and products during shipping and storage. For each project, we use our packaging knowledge to create preventive solutions that deliver cost savings. Our solutions include:

- **Moisture Barrier Materials** - We carry a large selection of moisture barrier materials, ideal for preventing corrosion. Many of our materials meet military specifications for tensile strength, moisture vapor transmission rates, sealing temperatures, and other qualities. Materials are available as bags, tubing, sheets and rolls.
- **Desiccants** - Protective Packaging Corporation is one of the largest distributors of desiccant and absorbent products in the country. We stock clay and silica gel desiccants in both Crepe Kraft bags and Tyvek® bags.
- **Volatile Corrosion Inhibitors** - We offer volatile corrosion inhibitors (VCIs) as emitters, films, papers, and liquids. VCIs protect metal and electronic parts from moisture and rust at the molecular level. By using an inexpensive corrosion inhibitor in your packaging program, you can increase product shelf life and reduce returns due to product damaged by corrosion.

Mil Spec Packaging Materials

Moisture Barrier Bags

On-Site Packaging Services

Protective Packaging Corporation

Our company is a flexible packaging converter producing barrier bags and custom covers for corrosion prevention and static shielding during shipping and storage. With over 25 years of experience developing packaging solutions for the US military, Protective Packaging Corporation has helped companies from a range of industries find the best flexible packaging solutions to preserve their products. The company carries a wide range of mil-spec compliant barrier materials available in rolls, sheets, tubes, bags and custom covers. The company's packaging consultants assist customers in addressing all forms of shipping needs, from protecting cargo during shipment to preserving items during long-term storage.
