*The Flexible Packaging Experts*

## Aircraft Protection Kits

Our pre-cut custom fitted kits provide the highest level of protection against moisture, insect damage and harmful UV rays. Save time on installation and get the best preservation materials on the market.

## Window Coverings

A pre-cut roll of FAA approved US military-spec moisture barrier material covers all passenger windows.

## Foil Wheel Covers

Individual covers for each tire protect against moisture and UV rays. Foil is pre-cut to fit over the tire and secured in place with heavy-duty aluminum tape. Canvas covers can be added for additional protection.

## Canvas Wheel Covers

Individual covers for each tire provide protection against UV rays, dust and insects for 5+ years. A Velcro strip holds the cover securely on the tire even in high winds.

## Inlet Marker Ribbons

1" x 1" screens with adhesive backings and orange marker ribbons protect and identify all air intakes. The screens allow the intakes to breathe without letting insects and other debris inside.

## Engine Covers

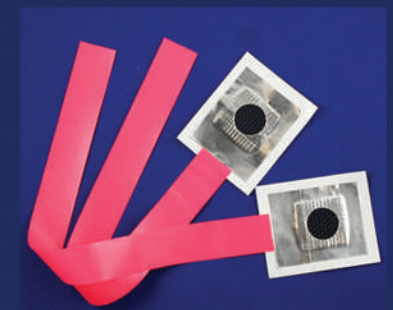

Our FAA approved military-spec moisture barrier material forms a perfect fit around the intake and exhaust of engines. This material performs to FAA specifications for humidity control. Humidity indicator cards and monitoring windows make readings a snap without having to remove the engine cover.

## Desiccants

We are one of the largest distributors of desiccant and absorbent products in the country. We stock a large variety of desiccants (clay and silica gel) in both kraft paper and Tyvek bags.

## Consulting Services

Do you have a particular problem you are trying to solve? We can help. We will consult with you on a custom solution for your individual needs.
