

# It's in the Bag

Corrosion Prevention and Static Shielding Solutions  
for Your Storage and Shipping Needs

**PROTECTIVE  
PACKAGING  
CORPORATION**

## Bags and Covers Made to Order

Protective Packaging Corporation uses industry leading products and materials to develop custom solutions that preserve products, equipment, parts, machinery, vehicles, and more during storage or transport. For each project, we use our packaging expertise to create preventive solutions that deliver cost savings. Our solutions include:

### ➤ Barrier Materials

The most prominent component in our solutions are our **military spec barrier materials** designed to protect from moisture, vapor, dust, UV rays, pests, and other contaminants. These materials are heat sealable, flexible, and durable, making them ideal for a variety of applications.

### ➤ Desiccants

We stock a large variety of desiccants (clay and silica gel) in both kraft paper and Tyvek bags.

### ➤ Volatile Corrosion Inhibitors

We offer volatile corrosion inhibitors (VCIs) as foam pads, sheets of material, and liquids. These protect both your metal and electronic parts from moisture and rust at the molecular level.

## Packaging Consulting Services

Do you have a particular problem you are trying to solve? We can help. Our executives possess a wealth of knowledge about how to protect your products, equipment and machinery during shipping and storage. We can analyze problems, develop solutions, and provide on site implementation or training services to make sure the job is done right the first time.

## Protective Packaging Corporation

Our company was initially founded in 1976 to service the US government and military. As a result, we have extensive experience developing packaging solutions that adhere to the most rigorous requirements. From protecting a weapons system for 20 year storage in a bunker, to preserving massive turbine generators for ocean transport, we pride ourselves on our versatility. We offer consulting services and on-site packaging services to help you select and implement the most appropriate and cost effective solutions.
